

Description	Evaluation	Likelihood	Impact Level	Responsibility	Response	Control Measures
Laptop breaks	Work may not have been saved, cannot continue working on current device.	Low	High	Developer	Retrieve work where possible (e.g. code from GitHub), find an alternative device on which to continue.	Make sure that code is backed up to GitHub. Create backups of other important files and save in the cloud.
Project is not finished on time	Project may be incomplete, missing functionality or important documentation	Medium	Medium	Developer	Focus on finishing MVP, break up remaining tasks and add them to a time-schedule to ensure all aspects of the project have been covered to at least a basic level.	Manage time by allocating tasks to a schedule. Set daily goals to complete by each day.
Internet collection failure	Cannot connect to remote repositories or Jira board	Low	Low	Network Provider	Move to a different location with internet availability. e.g. public library	Ensure there are places nearby with publicly available internet. Periodically write down next few Jira tasks to complete.
Failure to resolve bugs in the code	Code is not clean, will not run as required	Medium	High	Developer	Request help from tutors to go through code and find the errors to be fixed.	Ensure there is enough time for testing code and finding bugs. Ask tutors for help if stuck on a singular bug for longer than 30 minutes.
Forgetting to create documentation	Project is difficult to understand for other developers. Usability decreases.	Low	Medium	Developer	Create documentation.	Make short notes of tasks finished which can be used to build documentation from.
